

Abstract ID	Poster #	Poster Title	Presenter FN	Presenter LN
2405980	S-001	Population Pharmacokinetic (PK) and Pharmacokinetic-Pharmacodynamic (PK-PD) Modeling of the Effect of Dinutuximab- β on Cell Lysis in Pediatric Neuroblastoma (NB) Patients	Krutika	Patidar
2401277	S-002	A Pharmacometrician's Perspective on Differences in Electronic Data Submission Requirements Between PMDA and FDA	Shinri	Ikari
2403698	S-003	A semi-mechanistic model for the prediction of the prevalence of nausea with GLP-1 therapies, application to phase 3 trial design for danuglipron	Theodore	Rieger
2393213	S-004	PK/PD Modeling of Dexamethasone and Methylprednisolone Effects on Corticosterone, Lymphocytes, and Granulocytes in LPS-Inflamed Rats	Wensi	Wu
2403627	S-005	Model-informed Drug Development Approach to Guide New Dose Regimen in Fitusiran Label	Xiaotang (Jessica)	Ma
2405303	S-006	Optimizing Clinical Trial Designs Using a Quantitative Decision Framework: Integrating Pharmacometric, Commercial, and Financial Valuation Models to Optimize Value	Tyler	Dunlap
2405315	S-007	Semi-Mechanistic Pharmacokinetic/Pharmacodynamic Modeling of ADC-Induced Thrombocytopenia: Characterization of Platelet Dynamics and Evaluation of Prophylactic Interventions in Patients with Lung and Breast Cancers	Zeel	Shah
2405352	S-008	Development of a Psoriatic Arthritis (PsA) Quantitative Systems Pharmacology (QSP) Model	Dawei	Song
2405419	S-009	A Quantitative Systems Pharmacology Modeling Approach to Evaluate and Predict Cytokine Release Syndrome Risk of Various Step-up Dosing Strategies for Odronektamab in Patients with B-Cell Lymphoma	Mukti	Chowkwale
2405653	S-010	Biomarker-guided Early Risk Stratification to Identify Inadequate Therapeutic Control to Eculizumab Therapy for Pediatric Transplant-associated Thrombotic Microangiopathy (TA-TMA)	Kana	Mizuno
2405754	S-011	The impact of patient-reported toxicity and associations with medication adherence in real-world patients with hematologic malignancies	Ghassan	Slim
2405948	S-012	A Minimal Physiologically-Based Pharmacokinetic and Pharmacodynamic Model for Sabatolimab and Spartalizumab Combination Therapy: Neonatal Fc Receptor Competition, Dosing Schedule, and T-Cell Exhaustion in Cancer	Siddarth thenkondar	Thanigan
2405174	S-013	Development and Calibration of an Immunological Quantitative Systems Pharmacology Model to Describe Cellular Response to Two Vaccine Modalities Against Herpes Zoster in a Phase I/II Clinical Trial	Rory	Marriott
2403916	S-014	A natural history model of Friedreich's ataxia to de-risk clinical trial design	Luke	Kosinski
2405449	S-015	OmicTMDD: a transcriptomics-informed framework for predicting target-mediated drug disposition, pharmacokinetic, and dose	Louis	Joslyn
2398753	S-016	Adaptive Dosing Model Development for Vadadustat to Correct Simulations Due to Discrepancies Caused by Dose Changes	James	Clary
2405019	S-017	Cross-Species Systems Pharmacokinetic Modeling of GalNAc-siRNA Disposition: Effective A Priori Prediction of Human Liver Exposure	Viva	Ayyar
2403220	S-018	Transforming Patient' Voices into Early Predictors of Survival to Inform Patient-Centered Decision Making	Congyu	Zhang
2405356	S-019	LLM assisted PBPK-QSP Modeling of Bispecific T-Cell Engagers in PK-Sim/MoBi	Alexander	KULESZA
2393512	S-020	A Plug-In Mechanistic Cytokine Release Syndrome Module for T-cell Engager Models: Translating Cytokine Profiles into Clinical Endpoints	David	Dai
2399492	S-021	Evaluation of Rat Tissue Partition Coefficients for mRNA-LNPs to Support Human Tissues Exposure Predictions	Miao	Zhang
2399792	S-022	A Semi-Mechanistic Model Describing Tumor Dynamics and Progression Following Tarlatamab Treatment in Patients with Extensive-Stage Small Cell Lung Cancer	Stefanos	Papadopoulos
2405855	S-023	Integrated Pharmacometrics–Quantitative System Pharmacology Approach in Model Informed Dose Decisions for MK-2010, a PD-1 $\times$ VEGF bispecific antibody	Jimmy	He
2399568	S-024	An alternative Approach to Traditional Exposure-Response Analyses: Leveraging Population Pharmacokinetics and Receptor Occupancy Data to Support Phase 3 Dose Selection of RAP-219	Stephen	Greene
2401628	S-025	Dose Selection for GUCY2c $\times$ CD3 Bispecific Antibody (PF-07062119) Utilizing Model Informed Drug Development (MIDD) in Early Clinical Development	Bryan	Remaily

ACoP 2026 Poster Numbers – 7.30.26
